

**“WE
PROVIDE THE BEST
STEEL CONSTRUCTION
SOLUTIONS,”**

Top 5 Reasons to Choose EMR

1

Value at Every Step of the Process

Our designers, managers and ground crews work in unison through each step of the process, seamlessly turning your chosen design into reality. Combined with our competitive pre-engineered steel building pricing and ability to tailor a design to suit any need, EMR is your proven choice for pre-engineered steel buildings.

2

International Quality Standards

EMR Steel Construction works with building professionals and design teams meet every international standard whenever it comes to construction of each metal structure.

3

Reasonable Price!

Multipurpose steel buildings from EMR are affordable. Sophisticated computer programs create the perfect structure for your needs and location quickly and easily.

4

EMR Turns Your Dreams to Reality

Turn your dreams into reality with EMR Steel, a gifted and certified manufacturer of incredible steel design.

5

Customer Satisfaction

A happy client is our best advertising! If you have a steel building project that you would like to discuss, call EMR. We specialize in both pre engineered metal buildings and structural steel construction.

About Us

With long years of experience EMR STEEL CONSTRUCTION has become one of the leading companies in the manufacturing of structural steel buildings .we provide turnkey service that is properly designed focused on achieving efficiency of cost, time, and quality, we are well set up to handle contracts of any size or volume worldwide and considering our clients' satisfaction as a priority in every project

OUR HEAD OFFICE MAHMUTBEY MAH. 2416 SK.
AKTEM PLAZA NO:4/64 İSTOÇ - BAGCILAR - ISTANBUL / TURKEY

OUR FACTORY

EMR Steel Construction is located in Duzce City-Turkey on a 10.000 m² land, 5.500 m² closed area, 1.200 tons per month capacity, all kinds of technology are used in a modern production facilities.

The construction of steel structure hangars, warehouses, hospitals, schools, residences, sports halls and public purpose buildings is realized as turn-key projects by our company. Our company has been involved in the manufacturing many industrial structures in more than 27 countries

PRODUCTION PROCESS

Having adopted the principle of fast and high quality production with fully automatic sandblasting and painting plant, fully automatic CNC drilling, cutting units and CNC plasma cutting lines, EMR Steel Construction has gained the trust of the leading companies in the business world and has successfully signed many facilities

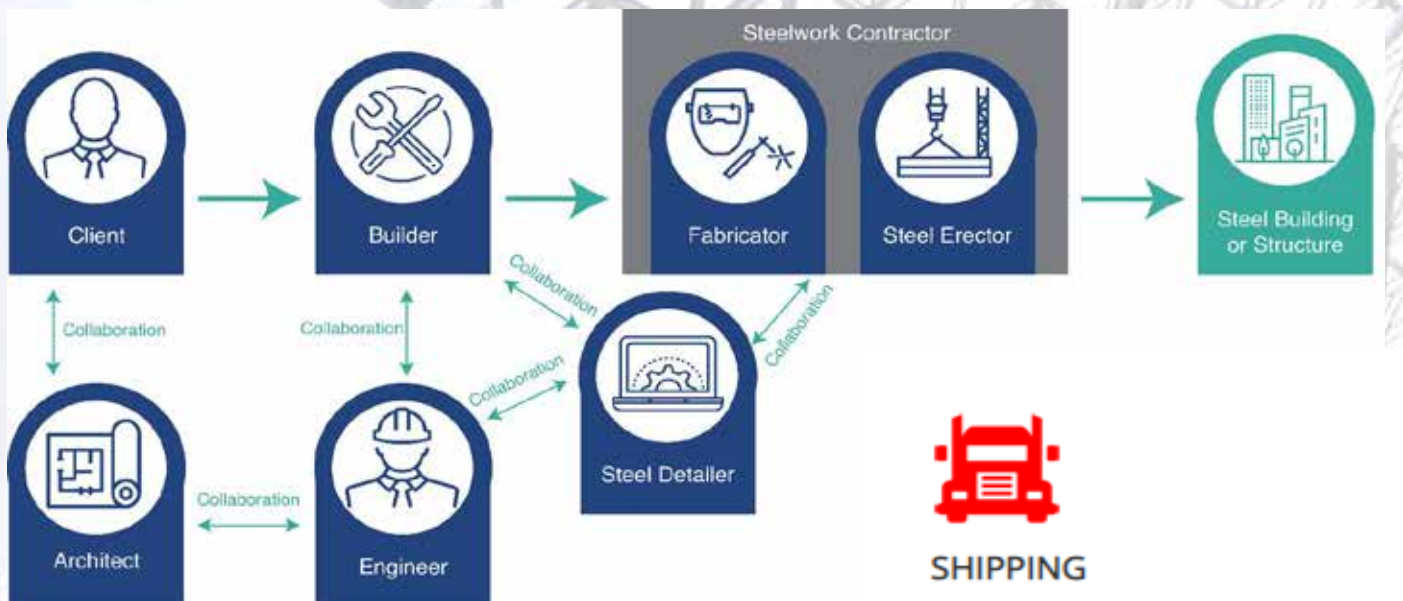

WHY EMR STEEL CONSTRUCTION ?

Value at Every Step of the process

We delivered high level customer service projects across the World continents. Our designers, managers and ground crews work in unison through each step of the process, seamlessly turning your chosen design into reality. Combined with our competitive pre-engineered steel building pricing and ability to tailor a design to suit any need, EMR STEEL CONSTRUCTION is your proven choice for pre-engineered steel buildings.

WHAT WE DO

ARCHITECTURAL DESIGNS

With a team of engineers and project managers, we work to map and scope the entire project. offers valuable insight into designing steel structures that meet capacity needs, structural requirements and overall project timelines

COMMERCIAL BUILDINGS & INDUSTRIAL BUILDINGS

There are very several studies out that show prefabricated steel is the better solution. Steel is the efficient, strong and sturdy solution for commercial buildings. When it comes to commercial buildings our steel warehouse buildings are perfect for commercial use. Its design

depends on the client's requirement and design. The steel warehouse building is a type of frame building, of which the frame structure mostly consists of steel beams and columns. The steel structure can be made by way of both warm or cold rolling.

Here are some of the many building applications that are well suited to EMRs designs

HANGARS

LOGISTIC WAREHOUSES

EDUCATIONAL BUILDING
AGRICULTURE

LIVESTOCK &

HEALTHCARE B BUILDINGS
HANGARS

AIRCRAFT

OUR PROJECTS

AK-EV TURKMENISTAN

EMR Steel Construction designs social facility buildings such as schools, hospitals, sports facilities, cultural centers, bazaar places, municipalities and community groups in with architectural teams according to the customer's wishes

AFRIPLAST

We have the knowledge of nearly a century of hangar design and construction, and all our hangars are designed to fully meet the individual needs of each client.
